Did you ever hear back from Ken on this? We could sample early next week.

Regards,

John

Hi, Ken:

Hopefully, the last change. We would like to split the sampling of your wells into 2 events: perform the analytical sampling of the Hewitt wells within the next couple of weeks, then do the analytical of the CalMat wells, as well as the water level of all the wells, in April with the larger sampling event.

Would you please let me know if you have any problems with this request?

Thanks, and have a good one!

Hi, Ken:

Due to the delays we have encountered, both in weather and obtaining your access approval, I have decided to postpone the sampling event of your wells until our next regional event which will be in April. This is to ensure our data is comparable to the other data, as well as to maximize efficiency. I assume that the process we have worked out to gain access to the wells will still apply, so we will follow those when we are planning for it, which will likely be in March.

Please let me know if you have any questions.

Take care, and Happy New Year.

Subject: RE: Basin-wide sampling event request

Dear Mr. Ehrlich;

My apologies for not providing you, Mr. Anderson, and Mr. St. John with an update regarding the sampling plans. To keep this effort as cost-effective as possible, we are trying to coordinate the sampling efforts such that two to three facilities can be sampled during each mobilization of the sampling team. Due to the initial questions about which Vulcan wells would be sampled, if any, we planned to sample them as part of a follow-on mobilization later in December (together with wells at another facility in North Hollywood that were not able to be sampled during our early December mobilization).

Unfortunately, due to the sampling team's schedule and severe weather in Los Angeles during the week before and after Christmas, we have not yet been able to schedule the follow-up mobilization of the sampling team to the remaining facilities, including Vulcan's. We plan to contact Mr. Anderson, Mr. St. John, and the representative for the other unsampled facility next week to arrange a sampling date that works for all parties.

Either myself or the sample team leader, Andy Austin, will contact Mr. Anderson and Mr. St. John next week to arrange a date in early January for sampling the Vulcan wells. Thank you for your assistance.

Regards,

John Lindquist

Hi, Ken:

As you probably noticed from my out of office response, I am on vacation until Jan 4. I have asked John Lindquist, my consultant at CH2MHILL who was coordinating the sampling event, to get back to you, if he can. If not, I will check into it, and get back to you early next week when I return.

Take care, and have a Happy New Year.

Kelly et al-

When we spoke after your 12/2/10 email below, I referred you to Brian Anderson at Vulcan to coordinate. To date, Brian has not received any call or email from EPA. We need to coordinate this sampling to ensure proper access and controls. When does EPA plan to conduct this sampling?

In addition to contacting Mr.. Anderson, please also coordinate with Charles St. John at Vulcan. Mr. St. John's contact info is below:

Charles St. John
